IDENTIFIERS	*Los Angeles Community College District; Weekly Student Contact Hours

ABSTRACT

This publication provides historical data on enrollment, weekly student contact hours, and average daily attendance (ADA) for the Los Angeles Community College District and for each of the nine colleges in the district. Detailed enrollment data by student category (day/evening, male/female, full-time/part-time, freshman/sophomore, etc.), ethnic group, and age are provided for recent years. Ten-year trends are presented for less detailed enrollment and ADA information. Data concerning summer enrollment, weekly student contact hours, and ADA are provided for the last three years. District enrollments are also compared to those at other local institutions. District enrollment reached record levels of 124,839 in fall 1974 and 128,338 in spring 1975; these figures represent respective increases of 14.6 percent and 20.7 percent over comparable figures for the previous year. Spring enrollment exceeded fall enrollment in 1974-75 for the first time since 1968-69. Factors specifically influencing district enrollments include: the opening this spring of Los Angeles Mission College, expanded Outreach programs, increased recruitment efforts, and the addition of new instructional programs to the curricula. ABSTRACT

This publication provides historical data on enrollment, weekly student contact hours, and average daily attendance for the District and for each college in the District. Detailed enrollment data by student category, ethnic group, and age are provided for recent years. Ten-year trends are presented for less detailed enrollment and average daily attendance information. Weekly student contact hours and annual attendance ADA are available for seven years. Summer enrollment, weekly student contact hour, and average daily attendance data are available for the last three years.

District enrollment reached record levels of 124,839 in Fall 1974 and 128,338 in Spring 1975. These figures represented respective increases of 14.6% and 20.7% over the previous two semesters. Comparable Fall and Spring increases for non-LACCD community colleges in Los Angeles County were 9.3% and 17.6%, and for four-year institutions 3.1% and 2.6%. Spring enrollment exceeded Fall enrollment in 1974-75 for the first time since 1968-69.

Data from the United States Department of Education indicate that nationwide community college Fall enrollment increased 11.6% over 1973-74. Possible explanations for this increase are: (a) a shift of students to relatively inexpensive forms of higher education, (b) a perceived need by students to establish or upgrade vocational skills in the face of a "tight" job market, and (c) augmented student aid and veterans' programs. Factors specifically influencing LACCD enrollment include: (a) the opening this Spring of Los Angeles Mission College, the District's ninth institution, (b) expanded Outreach programs, (c) increased recruitment efforts by colleges, and (d) the addition of new instructional programs to college curricula.

Spring 1975 ethnic data reveal that Other White students represent the District's largest ethnic group (54.1%), followed by Black/Negro students (19.5%) and Spanish-Surnamed students (18.0%).

In 1974-75 the average day student carried a class load of 12.36 hours in Fall and 12.25 hours in Spring, compared to respective loads of 15.12 and 15.48 in 1968-69. Conversely, average evening Fall and Spring class loads have increased from 6.41 and 6.61 in 1968-69 to 8.45 and 8.89 in 1974-75.

Total annual average daily attendance has increased 32.3% since the 1968-69 academic year, with ADA generated by defined adults growing more rapidly (40.3%) than that generated by other-than-adults (30.6%). District apportionment ADA has increased 57.4% in ten years, while District apportionment income has increased 278.3% during the same period. District ADA represented approximately 12% of the State's total community college ADA in 1974-75.

GLOSSARY

Average daily attendance (ADA) is a measure of attendance that is calculated from weekly student contact hours.* Attendance ADA is calculated on a semester basis and is thus comparable to other measurements reported by semester. Apportionment ADA is calculated on an other-than-semester basis and is the figure used to determine State apportionment to the District. ADA is calculated differently for defined adult* than for other-than-adult* students.

Census day is a fixed date during a semester (usually Monday of the fourth week of classes) at which time counts of weekly student contact hours* and enrollment* are taken for State reporting purposes.

Continuing students at a college are students who were enrolled in the same college during the immediately preceding semester.

Day students are students who are taking one or more classes convening prior to 4:30 p.m.; the category thus includes students who are taking both day and evening classes.

Defined adult (DA) is a student who is 21 years of age or older and who is enrolled for fewer than 10 weekly student contact hours.*

Enrollment is a "head-count" of the total number of students in a college or District; enrollment, unlike ADA, does not reflect the number of weekly student contact hours* for which students are enrolled.

Ethnic status refers to racial affiliation as reported by students on a voluntary basis at the time of registration.

Evening students are students who are enrolled exclusively in classes convening at 4:30 p.m. or later.

First-time students at a college are students who were not enrolled in the college during the immediately preceding semester; the term includes both freshmen and transfers and also students returning to the college after an absence.

Freshmen are students who at the time of registration, have completed fewer than 30 semester units of college credits.

Full-time students are enrolled for 12 or more units during a semester.

Other-than-adult (OTA) students are under 21 years of age or enrolled for 10 or more weekly student contact hours.*

* Indicates Glossary entry

GLOSSARY

(Continued)

Part-time students carry less than 12 units.

Sophomores are students who, at the time of registration, have completed 30 or more semester units of college credit.

Weekly student contact hours (WSCH) are derived by multiplying the number of students enrolled in a class by the number of hours per week for which the class meets. A class with 10 students which meets three times a week would thus generate 3 x 10 or 30 WSCH.

DISTRICT PROFILE

Two-Year Enrollment Comparisons

Enrollment data for the District and for each of its nine colleges for the Summer, Fall, and Spring semesters of the past two academic years are presented on page 7. District enrollment reached record levels in Fall 1974 (124,839) and in Spring 1975 (128,338). These figures represented increases of 14.6% and 20.7% over comparable figures for the previous year. Spring enrollment exceeded Fall enrollment in 1974-75 for the first time since the 1968-69 academic year. District Summer enrollment declined 0.5% from 1973 to 1974, with individual college changes ranging from an 8% decrease at East to a 10.5% increase at Valley.

Los Angeles Valley College led the District in enrollment this Spring with 21,840 students. The largest percentage growth, excluding Instructional Television, was exhibited by West, with respective Fall and Spring increases of 27% and 29.1% over 1973-74.

The District's ninth college, Los Angeles Mission College, opened in Spring 1975 with 1,228 students. Mission is the 100th college of the California Community College system.

District enrollment in various student categories during the last two academic years is shown on page 8 for Fall semesters and on page 9 for Spring semesters. (Definitions of the various student categories may be found in the Glossary on pages ix-x.) These data indicate that :

- Day enrollment is increasing at a greater rate than evening enrollment--a reversal of last year's trend. Day students represented 59.3% and 58.3% of total Fall and Spring enrollment in 1974-75.
- Female enrollment continues to increase more rapidly than male enrollment, although the male-female ratio varies only slightly from last year.

- In both Fall and Spring, greater enrollment increases occurred among part-time relative to full-time students, freshmen relative to sophomores, and first-time relative to continuing students.

- Continuing last year's trend, large increases occurred among students aged 21 and over; this group comprised 70.1% of the District's total enrollment in Fall 1974 and 71.9% in Spring 1975.

District Ethnic Enrollment Data

District ethnic enrollment data for the past two academic years are presented on page 10. When interpreting these data it must be remembered that ethnic data are collected from students on a voluntary basis; therefore, semester-to-semester differences may merely reflect differing attitudes towards reporting data rather than changes in ethnic enrollment. The percentages of students reporting ethnic status were 90.8% in Fall 1973, 70.1% in Spring 1974, 64.1% in Fall 1974, and 76.7% in Spring 1975.

The ethnic data reveal the following trends:

- Other White (i.e., Caucasian) students represented the largest single ethnic group in the District in all semesters reported here. However, in Spring 1975 Other White students accounted for 54.1% of the student body--the lowest percentage yet for this group.

- Black/Negro students comprised the second largest ethnic group in the District in Spring 1975 (19.5%). This group also appears to be declining slightly in its percentage of total enrollment.

- Spanish-Surnamed students represent the District's third largest ethnic group, comprising 18.0% of the District's student body in Spring 1975. Spanish-Surnamed students exhibited the largest growth in the District between Spring 1974 and Spring 1975.

Age Distribution Data

Detailed student age data are shown on page 11. From these data it can be seen that students in the under-20 and 20-24 age groups have represented a smaller portion of the total enrollment each year since Fall 1972. In fact, the actual number of students in the under-20 age group has decreased 2.7% from Fall 1972 to

Fall 1974. All other age groups have increased steadily over the past two years, with the largest increase (112%) occurring in the 65-and-over age group. The average age of the District's student body has increased from 26.0 years in Fall 1972 to 27.7 years in Fall 1974, and exceeded 28 years for the first time in Spring 1975. If this trend were to continue, the average age of the District's student body would reach 30 by 1979-80.

Ten-Year Enrollment Comparisons

Ten-year enrollment data for Fall and Spring and three-year data for Summer are presented on pages 12 and 13. These data reveal the following long-term trends:

- Total District Fall enrollment has grown 68.3% and Spring enrollment 76.5% since the 1965-66 academic year.
- During the past ten years, day enrollment has experienced a larger increase than evening enrollment in both Fall and Spring. However, evening enrollment has grown faster than day enrollment over the past three years, a trend that is expected to continue next year.
- This year, Spring enrollment (128,338) surpassed Fall enrollment (124,839) for the first time since 1968-69.
- Summer day enrollment has increased 12.4% and Summer evening enrollment 11.0% over the past three years. Total District Summer enrollment has increased 11.9% since 1972.

Comparative Enrollments at Other Institutions

District enrollment for the last two academic years is compared with that of two and four-year colleges in Los Angeles County on page 14. Total non-LACCD enrollment grew 9.3% in Fall and 17.6% in Spring, compared to District increases of 14.6% and 20.7%, respectively. All community colleges in the County showed increases in both Fall and Spring of this year, particularly in the latter semester. The largest increases were exhibited by the College of the Canyons in both Fall (19.4%) and Spring (39.8%) semesters. Four-year institutions increased 3.1% between Fall 1973 and Fall 1974 and 2.6% between Spring 1974 and Spring 1975.

Data from the United States Department of Education indicate that nation-

wide community college Fall enrollment increased 11.6% over 1973-74. Possible explanations for this increase are: (a) a shift of students to relatively inexpensive forms of higher education, (b) a perceived need by students to establish or upgrade vocational skills in the face of a "tight" job market, and (c) augmented student aid and veterans' programs. Factors specifically influencing LACCD enrollment include: (a) the opening this Spring of Los Angeles Mission College, (b) expanded Outreach programs, (c) increased recruitment efforts by colleges, and (d) the establishment of new instructional programs by many colleges.

Weekly Student Contact Hours (WSCH)

Weekly student contact hours (WSCH) may be thought of as classroom hours. A class which meets three times a week and contains 10 students produces 3 x 10 or 30 WSCH. WSCH, like enrollment, is computed as of census day, which is Monday of the fourth week of classes during Fall and Spring semesters and Monday of the second week during Summer sessions.

District WSCH and WSCH per student data are presented on pages 15, 16, and 17. In general, both Fall and Spring day class loads have steadily decreased since 1968-69 while the reverse is true of evening loads. This year the average day student carried a class load of 12.36 hours in Fall and 12.25 hours in Spring, compared to loads of 15.12 and 15.48 hours in 1968-69. Conversely, average evening class loads have increased from 6.41 in Fall 1968 and 6.61 in Spring 1969 to 8.45 and 8.89 in 1974-75. Both day and evening class loads are expected to stabilize near the 1974-75 levels. No clear trends are discernible for Summer day and evening loads, although total Summer WSCH per student appears to be increasing slightly.

Average Daily Attendance (ADA) and Apportionment

Average daily attendance, like student class load, is calculated from weekly

student contact hours. An important distinction in regard to ADA is made between "defined adults" (DAs) and "other-than-adults" (OTAs). The former category consists of students aged 21 or over who are registered for fewer than 10 hours during census week; the latter category consists of all other students. The importance of the DA-OTA distinction derives from the fact that the two types of students generate different amounts of state apportionment income for the District. (The formulas used to compute ADA for the two categories differ only in the mathematical constant by which WSCH are multiplied.)

Year to year comparability of attendance ADA is difficult because the method of computation used to derive the ADA has changed irregularly. These changes have recently involved ungraded classes, apprenticeship and short-term classes, and non-California-resident students.

Ten-year day - evening comparisons of attendance ADA data are provided on page 18 and OTA - DA comparisons on page 19. Annual attendance ADA figures for the last seven years are presented tabularly on page 20 and graphically on page 21. Total annual ADA has increased 32.3% since 1968 69, with ADA generated by DAs increasing 40.3% and ADA generated by OTAs 30.6%. ADA produced by OTAs has traditionally exceeded that produced by DAs, comprising 80.8% of total ADA in 1974-75.

The table on page 22 and the figure on page 23 show District apportionment ADA and the amount of state apportionment for the past ten years. Apportionment ADA is derived by making the following adjustments to OTA attendance ADA: (a) ADA generated by students who live within LACCD boundaries but attend a community college in another district is added, and (b) ADA generated by students who live within the boundaries of another district but attend an LACCD college is subtracted. Apportionment ADA for DAs currently consists of those students attending Los Angeles Community College District institutions, regardless of residence, although this definition is currently being

reviewed by District administrators. District apportionment ADA has increased 57.4% in the last ten years; the amount of apportionment income received by the District has increased 278.3% during this time. Most of the latter increase can be attributed to the passage of Senate Bill 6, which increased the amount of apportionment per ADA and incorporated inflationary increases in the yearly income figure. Los Angeles Community College District ADA amounted to approximately 12% of total State community college ADA in 1974-75.
